

Market Operations Notice

Wednesday 17th April 2013

Reference Number: 0011/13

Subject: Expansion of Tradable Universe Update: Production and Participant Test Environment Changes

Participant Test Environment (PTE):

The securities universe in PTE has been updated so that all securities are now available for Continuous Trading. Going forward any securities added to PTE will be made available for Continuous Trading.

In some circumstances securities may not have an AOT value present in the Chi-X Tradable Securities List (CHIXTSL). Where this is the case AOT values will be determined using the price of the first trade and the table below.

Participants are encouraged to review the updated CHIXTSL in PTE to confirm their systems can handle the situation where AOT values are not present.

Production:

From Monday 22nd April, as ASX introduces new securities, they will be automatically added to the list of securities available for Continuous Trading on Chi-X. Participants are advised that as a result of these progressive changes the current practice of announcing the addition of new securities that are available for Continuous Trading with 2 days' notice will no longer continue.

In common with PTE, some securities may not have an AOT value present in CHIXTSL and like PTE they will be allocated values based upon the price of the first trade using the following table.

Security Price	Group	% (percentage)	\$ (absolute)
0 < \$1	A	15	0.1
\$1 < \$2	B	12	0.2
\$2 < \$5	C	11	0.5
\$5 < \$10	D	10	1.0
\$10 < \$30	E	9	3.0
\$30 +	F	8	5.0

The timeline for the completion of the transition to the full ASX quoted universe is still on target for 3rd May 2013 and will be reconfirmed week commencing 22nd April 2013.

Full details of Chi-X's plans to expand the tradable universe were published in Market Operations Notice 0007/13, which can be accessed [here](#).
