

Market Operations Notice

Friday 8th June 2012

Reference Number: 0008/12

Subject: Release of Trade Reporting and Mid-Point enhancements from 12 June 2012

As previously advised in Market Operations Notice [0004/12](#) and Technical Notice [0001/12](#) Chi-X plans to implement enhancements to its trading system this weekend. The major enhancements are:

- Permit full range of trade report types to be lodged with Chi-X;
- Provide enhancements to Mid-Point Orders, including the ability to set a half tick limit price and minimum executable quantity.

The release also includes a change to the daily Securities Master List - CHIXTSL.txt to include anomalous order thresholds for each security.

Specifications for these changes can be accessed [here](#).

If you have any queries concerning the release, please do not hesitate to contact Market Operations.
