**Subject:**

- **Co-ordinated Participant Testing Successfully Concludes**
- **Correction to System Availability dates during October**
- **ASX agrees to extend CHESSE connectivity**

**Co-ordinated Participant Testing Successfully Concludes**

Another significant milestone was completed this afternoon with the conclusion of Co-ordinated Participant Testing (CPT). Launch partners actively supported the CPT programme and we are grateful for the continued support and constructive feedback.

At the time of publishing this notice 100% of firms involved in CPT have provided their attestation statement and the external reviewers are already busy reviewing these documents with a view to generating a report for ASIC by the end of next week. We are pleased to say that a quick review of the attestation statements indicates that most firms are ready to proceed to launch.

**Correction to System Availability dates during October**

The remaining key milestones for October were published in [Market Operations Notice 0014/11](#).

**Please note** that that Notice had incorrect dates for the production system availability during October. The production system will be down on Monday and Tuesday next week, 3-4 October.

**It will then be available for further testing from Wednesday 5 October until COB on Monday 24 October.** Apologies for any confusion this may have caused.

**ASX and CHESSE connectivity**

ASX has issued a bulletin advising that it will continue to support CHESSE connectivity for testing next week from Tuesday 4 October to 7 October.

Kind regards,

**Chi-X Australia**
